Our Philosophy

Vision

We develop scalable SaaS solutions for complex organizations with demanding requirements for stability, data protection and governance. Our aim is to structure digital processes so they can be operated reliably, efficiently and sustainably—even in regulated and security-critical environments.

Mission

Our platform empowers organizations to independently implement digital communication and event formats in an auditable and scalable way.

Our goal is not merely to provide technology, but to establish digital standards that increase your efficiency and transparency over the long term.

The Polario Universe

Open to Your Development Requests

- Interfaces
 - Integrate content using our open RESTful API
- Feature development driven by customers, too
 - Examples: podcasts, journeys & gamification
 - Features of this kind are also made available to the entire customer base
 - Synergies: You also benefit from individual customer requests
- Custom feature development
 - Connection and integration of selected external services/partners
 - Adaptation of existing features to your requirements

Pre-Event Page

Create a Strong First Impression

- Website for announcing event content as part of the Event App
- Rapid deployment and intuitive setup
 - Drag-and-drop editor
 - Integration of various media formats
 - For desktop and mobile (responsive)
- Integration of agenda, speakers and more from the Event App CMS
- Integration of app download buttons, registration and more

Guest Management

registr – Communication & Registration

- Web-based participant registration with responsive design
- Various registration options
 - Closed participant group / open registration / registration without an account
- Use of questionnaires for registration
- Use of various mailings
 - E.g. personalized invitations, reminders or personal access codes
- Guest list in the backend with registration-status filters
- Individual language selection for users
 - (German, English, Spanish, French, Italian and Polish)

The image shows a mobile app interface for an event portal. At the top, there is a header with a logo and the text 'Ihr Logo'. Below the header, the main content area displays a welcome message: 'Welcome at the Event portal'. Underneath, it says 'Please log in to continue'. There are two tabs: 'LOGIN' (selected) and 'REGISTER'. The login form has two input fields: 'Username*' with the value 'm.mustermann@plazz.net' and 'Password*' with a masked password '.....'. To the right of the password field is a link icon. Below the password field is a link that says 'Forgot password'. There are two checkboxes with labels: 'I have read and accept the terms of use.' and 'I have read the data protection conditions and agree that the data provided by me may be collected and stored electronically.' Both checkboxes are checked. At the bottom, there is a blue button labeled 'Login'. Below the button, there is a line of text: 'If you have any questions or problems, please contact support at support@mobile-event-app.com.'

registr – Communication & Registration

- Individual & bulk changes to the guest list
- File upload for registration
- Registration of accompanying persons
- Dynamic guest-list filtering
- QR code delivery
- Wallet integration

Event App

COMMUNICATION THAT CONNECTS AND ENDURES

Polario delivers modularity at the touch of a button—because communication is always evolving!

Multipurpose
Approach

Live Feature
Configuration

Rapid
Deployment

Inform

 = Premium Feature

Agenda

The agenda gives users an overview of the current program. They can find all presentations with the corresponding room and time information and switch between days and categories.

- Category & room filters
- Comprehensive presentation details

Podcasts

Use the integrated audio player to bring podcasts directly into your app. Users can play episodes, switch between categories and continue using the app thanks to the mini player.

- Flexible playback of individual files or entire series
- In-app navigation while listening

Bookings

Use the booking feature to set capacities for selected agenda items and give users the opportunity to register for limited-capacity presentations, workshops and similar sessions.

- Bookings at a glance
- Management in the CMS

Maps

Points of Interest let you store multiple interactive maps in the app. Each point on a map can also include a link with additional information.

- Links for individual points
- Interactive map

Interact

 = Premium Feature

Polls

Integrate voting tools to collect real-time data—for a Q&A session, workshops or feedback. Results can be evaluated as bar and pie charts.

- Support for various tools
- Integration at many points in the app

Matchmaking

Matchmaking helps visitors find relevant contacts faster. Users assign themselves tags based on the “I’m looking for” and “I offer” principle and receive an overview of their best matches in the app.

- Independent user tagging
- Tag management in the CMS

Appointments

Enable your guests to book meetings independently and request appointments with one another. This is especially useful for networking and works perfectly with the matchmaking feature.

- Individual appointment booking between guests
- Ideal for networking events

Social Feed

Bring topics together in one place and encourage interaction among users. Comments and likes drive engagement, while posts can flexibly include text, images, video, links or files.

- Posts with text, images, videos, links & files
- Overview of selected feeds & flexible integration

Communicate

 = Premium Feature

Push Notifications

Inform your guests about changes and other news. Messages can contain links to app content and are stored in the Notification Center after being sent.

- Delivery to all platforms
- Saved in the Notification Center

Chat and Group Chat

The in-app chat keeps users connected at all times. Push notifications are sent for new chats, so no message is missed.

- One-to-one and group chats available
- Push service for messages

Languages

Make your app multilingual and accessible internationally. Automatic AI translations, a customizable glossary and flexible localization ensure an excellent user experience in every language.

- Support for numerous languages
- Individual localization for an optimal user experience

Channels

Give guests a simple way to collaborate and communicate. Whether channels are public or private, users can join, share content and communicate efficiently.

- Open or approval-based channels
- Sharing images, videos, links & documents

Monetization

Sponsors

Integrate your sponsors into the app and, if desired, organize them into categories such as Gold Sponsor, Platinum Sponsor or custom names.

- Various display options
- Links to sponsors

Advertising Spaces

Use the wide range of display options in our solution as advertising spaces for partners and sponsors—whether as a logo on the home screen, in the menu or via a link to a dedicated page.

- Effective monetization options
- Wide range of placement options

Full Control over Content, Design & User Management

The Content Management System (CMS) is the heart of Polario.

Thanks to drag and drop, tooltips and tutorials, the app is intuitive to edit—with up to 90% of the content customizable.

Participant import lets you quickly integrate large groups and, if desired, send a welcome email with access details.

- Comprehensive import functionality
- Flexible customization of content and design
- Immediate application of changes
- Export functionality for various content types
- Group-specific content delivery
- Analytics functionality

Targeted Content for Every Audience

Polario enables precise content delivery across iOS, Android and the web. Flexible group structures allow you to provide tailored information for in-person and online participants and connect both groups seamlessly.

In-Person Features:

- Easy usability with native apps
- QR code for check-in
- Directions
- Map
- Agenda with room overview

Virtual Features:

- Easy usability through the web version
- Live streams
- Virtual breakout sessions
- Virtual networking opportunities
- Digital presentation of exhibitors

Your Branding, Your Rules—Tailored App Design

Design your app in your own corporate design—from the start screen and app icon to the color scheme.

The personalized home screen provides all key time- and location-specific information.

The clear app menu keeps all content structured and accessible, creating an optimal user experience.

- High degree of app customization
- Custom fonts (custom app only; additional charge)
- Bundling key content on the home screen
- App menu for clear navigation
- App icon & custom pages

Two Routes, One Goal: Perfect App Placement

Available on iOS, Android & Desktop

App in the Polario Hub

The Polario Hub lets you provide your event without the effort of an additional app. The event is published within the existing Polario Hub. Participants use a code to unlock events—while your individual branding remains intact.

- Download the app from official stores as usual
- Rapid implementation of short-term projects
- No lengthy app-store registration

Custom App

Independent branding from start to finish. Publish your app through your own developer accounts. Our support team helps you set up the developer accounts and launch in the app stores.

- Control over app publication
- Your own app icon and description in the app store
- Faster app access for your participants

 - Participant directories, document storage, general information
 - One-to-one chat, chat channels and a social wall
 - News features and push notifications
 - Polls and feedback
 - Integration of live streams for events
 - Use of SSO login

Deutsche Telekom

Testimonial

The platform has enabled us to establish a consistent event infrastructure that significantly simplifies both planning and delivery. Its excellent usability is particularly noteworthy, enabling our specialist departments to manage content independently and flexibly.

Our collaboration has always been professional, solution-oriented and characterized by a deep understanding of our specific needs. Continuous development has steadily optimized the platform and adapted it to new requirements.

Overall, the solution has proven to deliver substantial operational and financial value.

We recommend the collaboration and the solutions used without reservation.

Hans Christian Schwingen
Corporate Communications & Marketing

REFERENCE

Ergo

- Approx. 40,000 app users annually and well over 100 events per year

Testimonial

We have been successfully using your software for four years. It enables us to efficiently manage events with participant numbers ranging from 50 to more than 5,000. The solution improves interaction with participants and provides them with a user-friendly platform for information and networking.

I particularly value the flexibility of your solutions, which we were able to adapt to our specific needs after implementation. The continuous improvements and updates you have provided have further optimized usability and functionality.

Our decision to extend our contract by another three years is based on the consistently positive experience we have had with your team. Your employees are always professional, responsive and committed to ensuring that our requirements are fully met.

I can recommend plazz AG as a service provider without reservation and am confident that you will provide valuable support to other companies as well.

 - News features and push notifications
 - Polls and feedback
 - Integration of live streams for events
 - Use of SSO login

SPOBIS

Testimonial

Compared with other IT projects, this one was less challenging thanks to the excellent collaboration. Challenges were successfully resolved together.

We have enjoyed working with plazz for more than six years. Our long-standing partnership has helped both sides develop a deep understanding of each other's working methods and expectations. This has made communication easier and accelerated decision-making.

The high level of professionalism and experience at plazz AG helped minimize risks. Overall, the project was a positive example of how successful IT projects should be run.

We are very pleased to recommend plazz AG and its solutions.
